3.9. There are 4 photo contest categories:

- The evaluation between cameras (compact; DSLR; Mirroless) and mobile devices will be distinct

3.10. There are 3 video contest categories:

- The evaluation between cameras (compact; DSLR; Mirroless; Action Cams) and mobile devices will be distinct

3.11. The submitted photos and videos will be judged by the Jury.

4. **PHOTOS - Categories**

- **Wide-angle:** Photo of the underwater environment, with fauna and flora, may or not contain a model.
- **Fish:** Fish photography as the main element of photography. It can be a fish or a shoal.
- **Close-up:** Detail of any underwater subject, including fish. Macro photography or close-up and detail photography.
- **Edited and Creative:** Free composition photo, allowed to use all possible functionalities available on the camera. The composition is to be made underwater.

- 4.1. The procedures for the selection of photos are according to the present Specific Rules.
- 4.2. Double exposure, image overlay, and cropping “in-camera” are allowed.
- 4.3. It is allowed to use the FX or DX function of the cameras before taking the photo.
- 4.4. **Photos not allowed** – Participants are not allowed to submerge artificial objects underwater to be used in their photos. The Control Committee will disqualify those photos. Artificial objects used to enrich the image's quality can be used but must not be seen in the photo, like colour filters (can be used on lights and lenses), strobes mounted or remote etc. The filter (colour paper or else) cannot be seen in the shot. A photo is not disqualified if a remote flash has been used and a part of the flash or its cable appears in the shot because the photographer was not able to hide it properly. It is understandable that it was not his intention that this element was a part of the shot. In this case, the jury is free to give high points or not to this photo as they may think that the image is far from being a professional photo. The contest wants to show the natural environment and the living beings that inhabit it at its best.
- 4.5. The participant must make sure that he/she cancels the *copyright* function and any metadata on the camera so that the images sent to the Jury cannot recognize the photographer by the file names or metadata.
- 4.6. At the beginning and the end of both immersions, each day, the participants must take a "control photo" with the judge visible in the frame.
- 4.7. Number of photos is unlimited.
- 4.8. It is not allowed to delete pictures.

5. VIDEOS - Categories

- **Promotional film of Madeira and Porto Santo:** Film should contain land and underwater images, aiming to captivate non-divers to get to know Porto Santo and Madeira Islands and its underwater world. Maximum film length is 1'30".
- **Underwater world film:** Film only with images of the underwater world aiming to show the beauty of the underwater nature. Can include the human element. Maximum film length is 1'30".
- **Fish Film:** Film just from the fish and their interaction with other fishes or environment. Divers can't appear in the film.

In any category you can include animations, voice over, music and subtitles. Voice over and subtitles must be in English. It is the author's responsibility to have the authorizations for the use of music and all the necessary elements to be exhibited by the organisation.

- 5.1. Procedures for selecting videos are according to the present Specific Rules.
- 5.2. It is mandatory to record the infographics, video images (both under and above water) and photographs that will be used in the project during the days of competition.
The participant will only be able to import into the project the following components that are not created during the editing time (free from copyright and previously registered by the organisation): sound effects, video effects, music, voice-overs and animations.
- 5.3. At the beginning and the end of both dives, each day, participants must film a "control take" with the Judge visible in the video.
- 5.4. For the non-underwater takes (land takes), the participants can have unlimited time filming. It will be allowed during the days of the Open (26th to 31st October). The memory card for the non-underwater takes will be different from the cards of the underwater takes. All these cards will be formatted, the date on the camera will be changed and cards will be marked, and a control take will be arranged before the 1st day of the Competition.
- 5.5. The non-underwater takes (land-takes) will be downloaded and verified by the Organisation in before being used and edited by the participants.
- 5.6. The post-production can be done in any moment, only by the Video Team. Editing done by others will be punished by the disqualification of the team. Competitors must start their project with a clean slate.
- 5.7. Competitors will work with their editing equipment; the lack of such equipment is not the responsibility of the Organisation.

- 5.8. **Drones** – It is possible to use drones to film on land, however it is mandatory to request the proper authorization to local authorities and to have the European Certification requested by law. Without these two conditions, it is forbidden to fly a drone.

Mobile Devices: The mobile devices will be control by the organization to check what images are captured during the competition. During the competition you need to have the equipment's in-flight mode and just work like a camera and memory card.

6. PROCEDURES REGARDING MEMORY CARDS

- 6.1. The following procedures apply to competition days:
- 6.1.1. Competitors go Athletes go to the place designated by the organisation for the control of their cameras.
